

**NORTENT**  
NORWAY

# NORTENT GEAR

# BACKGROUND

*Designed to give you comfortable shelter in the toughest terrain and weather.*

## THE STORY

The story behind Nortent goes 30 years back in time when the founder was young. At 19 years old he left home and joined the military where he was appointed a place in the army. In the military he spent much time in tents up in the north of Norway during all seasons. Here his real passion for the outdoors was sparked. .

Kjetil's role in the military was to instruct and educate other soldiers on survival techniques and

strategies in wilderness environments. When his military service ended, he continued with teaching with mathematics as one of his subjects. Through mathematics Kjetil discovered that many elements in nature are constructed by geometrics, where both human beings and animals experience a sense of harmony with shapes and sizes that have symmetry. If one looks closer one can observe geometric shapes and fractal patterns everywhere in nature. . An example of this is the golden ratio which is measured at 1,62. In example a staircase where the relation

between depth and height has the 1,62 ratio it feels natural to walk it. Without the 1,62 ratio it feels unnatural. The beautiful sunflower has a 1,62 ratio as well as endless other living features in nature.

This is why the mathematics teacher decided to design his own tent based on his scientific theories and

empirical knowledge. He studied the shelters the indigenous people had used for centuries to keep safe and warm in the rough climate of Norway. When developing his modern day version for camping and backpacking out in nature, it was natural to seek inspiration from the indigenous people's techniques based on ancient

Kjetil believes the tents to be esthetically appealing because human beings are a product of nature. That is why mathematical shapes and proportions appear in harmony and he aims for the tents to become intrinsically connected with nature. A tent should be both esthetic and practical.

With this in mind and at the same time. The perfect gear in the wild for NORTENT is spacious, lightweight, safe, easy to set up and of course comfortable, Equipment you can rely on in any situation, all seasons. After all, it is all about

having the right equipment in the bag that promotes the feeling of well-being when you are walking in the mountains or deep forests. If you have a comfortable trip, the experience and memories are easily brought to the next expedition. And the urge and yearning for nature become even stronger. For us, it is important to be able to stop where we want, stay overnight where we want, make camp, and trust that we are comfortable and safe. Crawl into the sleeping bag warm and satisfied without worrying about a storm, rain or cold. Yes, we are talking about the exceptionally good feeling of being

free together with nature. We believe that nature is your home,

and our tents should be your doorway.

A black dome tent is pitched on a rocky, grassy hillside. The tent is secured with yellow guy lines. In the background, a blue lake is partially frozen with ice floes. The surrounding landscape consists of rugged, brown mountains under a clear sky.

VERN SERIES

The tents in Vern series are extremely light tents for its size. Optimal for the longer hikes in mountains and over isolate plains where you really need a reliable shelter against the elements. With its aerodynamic, freestanding shape and many possibilities for anchoring the tent to the ground, this tent is a true friend which will keep you safe in the different elements.

Vern is designed to provide clean and correct lines that blend in with nature. We have placed great emphasis on the tent being able to be set up quickly and easily without obstacles. With a little practice you should be able to set up the tent in 2-3 minutes where you can then crawl into a warm and safe sleeping bag.

You may use Vern through four seasons. When the snow falls, or during extreme weather..

☐☐ **WE BELIVE YOU SHOULD NOT HAVE TO FIGHT THE ELEMENTS, BUT RATHER BECOME ONE WITH AND THRIVE IN THEM** ☐☐

A scenic landscape featuring a large lake in the middle ground, surrounded by lush green mountains. In the foreground, two black, dome-shaped tents are pitched on a rocky, grassy slope. The sky is filled with soft, white clouds. The overall atmosphere is serene and natural.

LY SERIES

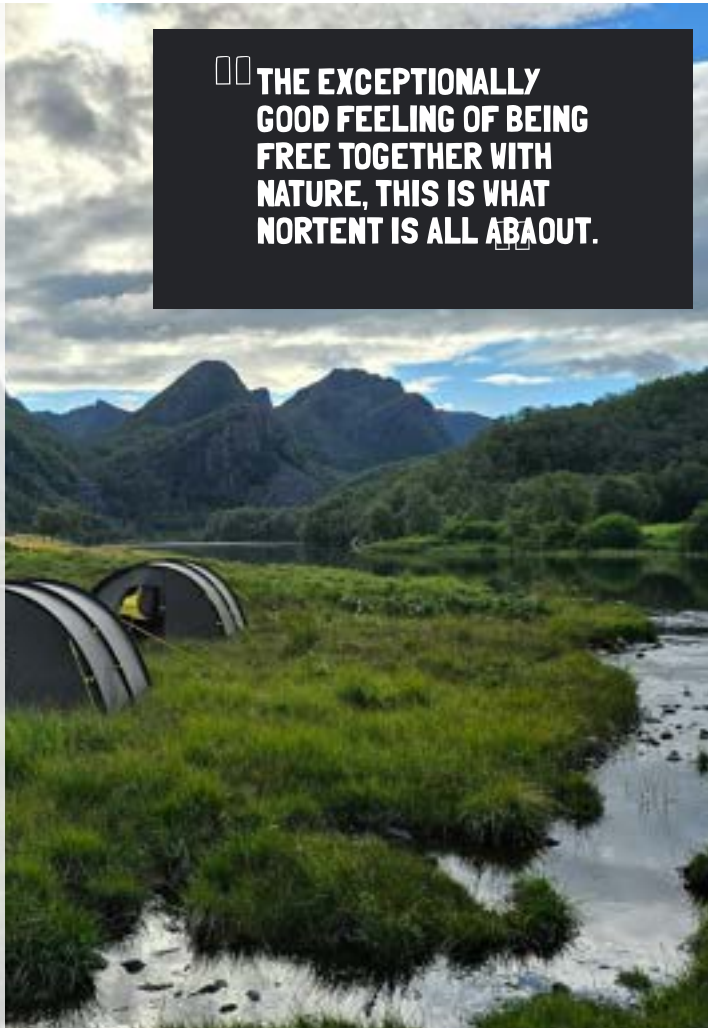

Ly is designed to be a light tent, but still a very functional and safe tent with plenty of room for one people together with all lot of gear and room for cooking. You can even bring your dog and let it have a whole dedicated vestibule for itself. We believe having a pleasant environment inside the tent enhances the complete outdoor experience.

Ly has a strong construction that can withstand severe weather conditions and snow-load. A very light shelter to carry in the bag. Our inspiration for this tent comes from our long walks in Norwegian mountains where weight always is essential and at the same time a gear providing a safe and secure shelter.

You may use Ly through four seasons. When the snow falls, or during extreme weather.

Another fantastic feature is the ability to connect multiple Ly tents, forming a spacious, interconnected shelter. Perfect for group trips or when you need a bit more room.

☐☐ **THE EXCEPTIONALLY GOOD FEELING OF BEING FREE TOGETHER WITH NATURE, THIS IS WHAT NORTENT IS ALL ABOUT.** ☐☐

GAMME SERIES

Our inspiration for this tent comes from an ancient Norwegian form of a hut. The Gamme has been used since the first people came to Norway thousands of years ago, providing a safe and secure shelter. It is still used today by indigenous Sami people of Norway.

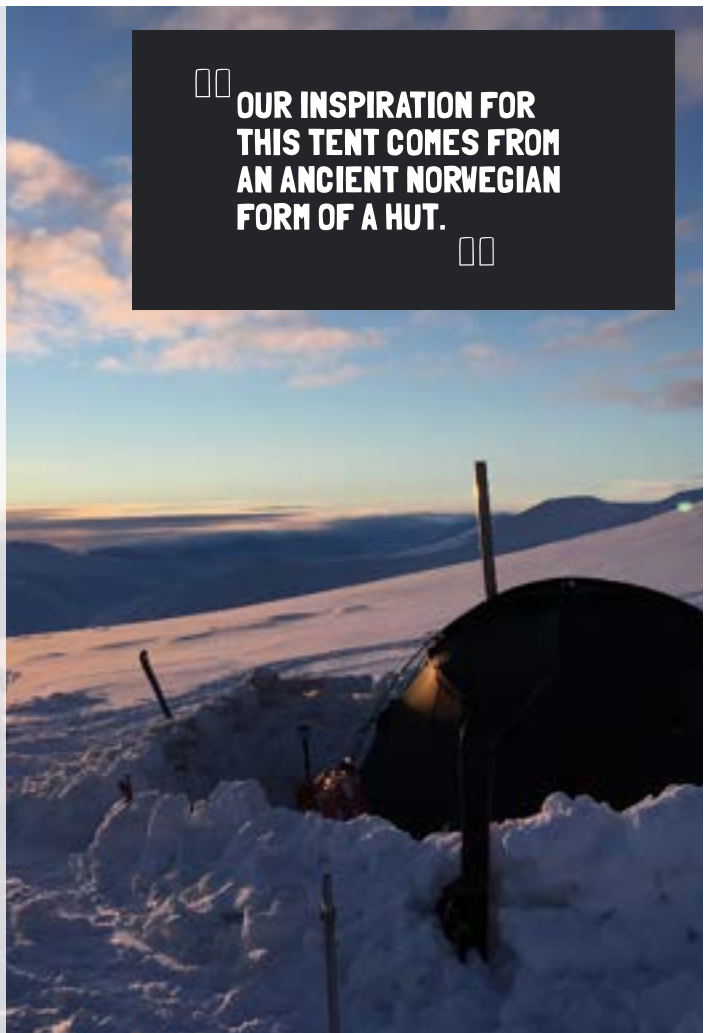

Gamme series has storm-flaps all around the tent to make the tent even more stable with snow, sand or stones over the flaps. A 4-season tent that provides shelter and protection in most conditions. Summer and winter. Even without the guylines, the tent stands very firmly in the wind .

Gamme is designed with a stove in mind. Being able to have a warm, pleasant, and cosy tent is something we believe lifts the adventure to completely new levels. While the storm rages outside with ice-cold winds and rain, one can enjoy an indescribable comfort inside the tent .

A truly versatile tent for the vast majority of

LAVVO SERIES

The Sami in Norway have through generations been in close contact with nature and has always sworn to the lavvo for protection against the harsh weather. This is also our inspiration when designing our Lavvo which is a Norwegian version of a tipi.

NORTENT Lavvo is a very flexible 4 season tipi. And is the result of a desire to develop a light tent that can be used in most situations. From family excursions to demanding walks in mountains and forests where comfort, flexibility, spaciousness and reliability are important factors.

Our Lavvo is lower than a traditional tipi. This is to achieve a perfect combination between comfort and aerodynamics. We have made a tipi with a relatively small angle so that the energy in the wind is not left on the flysheet, but is led up and around the tipi.

□□ **A LAVVO IS A NORWEGIAN TIPI USED BY THE SAMI PEOPLE IN NORWAY FOR THOUSANDS OF YEARS.** □□

KOIE SERIES

NORTENT Koie 7 is a very stable and solid tent. Koie 7 is designed to accommodate a "large" number of people, but still withstand a lot of weather. We have equipped Koie 7 with as many as 11 guylines in addition to 22 fasteners for stakes that encloses the tent. This gives a very solid and "fixed" tent that does not care that much when the wind increases. You simply avoid a lot of the flickering in the tent fabric you often experience with other tents as the 33 attachment stabilizes the fabric in such a way that the fabric itself is somewhat steady, stable and fixed..

Koie 7 is designed with a stove in mind. Being able to feel warm, pleasant and comfortable in a tent is something we believe lifts the whole outdoor experience to new levels. While the weather rages outside with icy winds and rain, you could enjoy a comfort inside the tent with 20-30 degrees Celsius. The location of the stove in Koie 7 is placed in the center of the tent where you may easily enjoy heat from both sides of

☐☐ **THE WORD "KOIE" COMES FROM AN OLD NORWEGIAN HOUSING THAT WAS SET UP TO PROVIDE SHELTER AND PROTECTION FOR WORKERS IN THE FOREST THROUGHOUT THE WINTER SEASON . ☐☐**

  - Hydrostatic Head: 3000 mm
- **Poles.** 2 pcs, high quality 7000 series aluminum. Optional carbon poles available

# TARPS / BIVI

Our tarps come in two different designs.

The **Bivuakk** is a Norwegian word that originally comes from military units to describe a simple, temporary camp outdoors where it will provide shelter from the elements. A bivuakk is basically meant to provide shelter and protection for one soldier or a small group of soldiers who are left alone out in the woods or mountains. This is also our inspiration for this lightweight, simple and versatile design that will provide a safe shelter.

The **Helleren**. The word "helleren" is actually a Norwegian name for a type of overhang carved in the mountains giving a natural shelter for both animals and humans. Our Helleren packs down to a very small gear, weights almost nothing and takes up very little space in the backpack. Helleren is sewn in a so-called catenary cut. We have chosen this cut to reduce movement and flapping of the flysheet when it is windy.

□ □ OUR TARPS ARE PERFECT FOR THOSE WHO REQUIRE A TRULY ULTRALIGHT ALTERNATIVE THAT PROTECTS YOU FROM THE THE ELEMENTS, BUT WHERE AT THE SAME TIME YOU DON'T WANT TO COMPROMISE ON DURABILITY AN QUALITY . □ □

# BIVUAKK

## Fabric

# STOVES

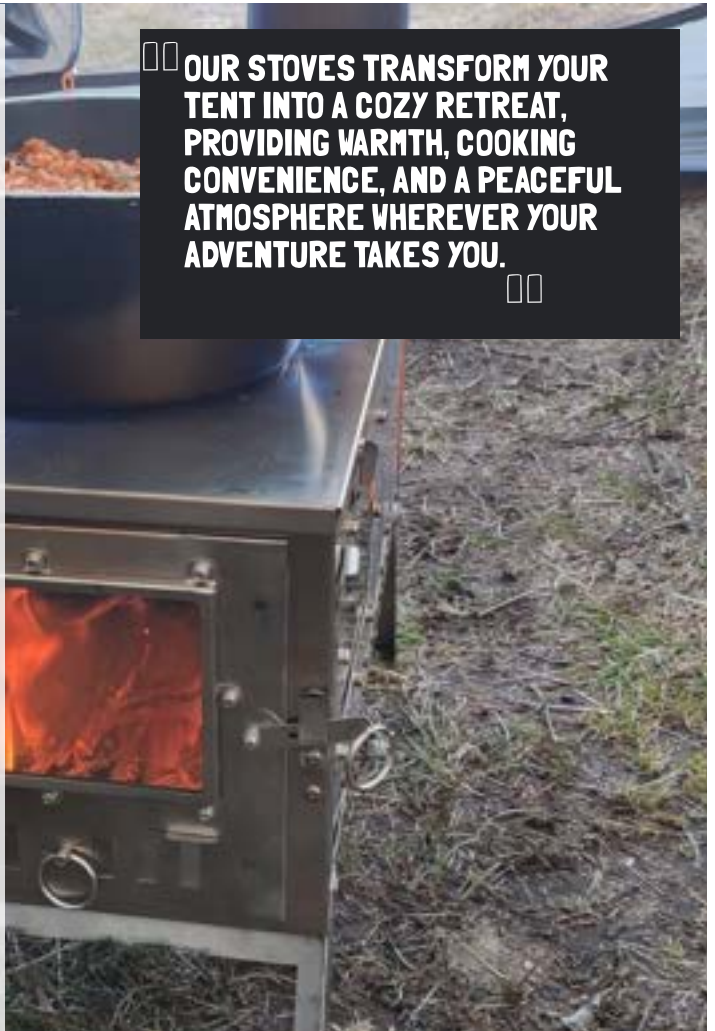

NORTENT stoves makes life in a tent to a very comfortable experience. It is our desire to be able to bring an efficient wood-burning stove in your tent without either taking too much space or weight. NORTENT stove is designed for use with our tents. But could also be used in other tents which are adapted to use a wood-stove.

The stove provides a comfortable temperature and atmosphere inside the tent regardless of the outside environment. The stove is also a natural area for cooking where you have the opportunity to prepare food and boil water. Various cooking appliances become redundant.

It also gives you new opportunities with your wet and damp clothing where you are able to dry up regardless of the weather outside. The wood-stove will keep condensation and moisture in the tent at bay.

☐☐ **OUR STOVES TRANSFORM YOUR TENT INTO A COZY RETREAT, PROVIDING WARMTH, COOKING CONVENIENCE, AND A PEACEFUL ATMOSPHERE WHEREVER YOUR ADVENTURE TAKES YOU.**

A black quilted sleeping bag is laid out inside a tent. The tent's interior is lined with a tan-colored fabric. The sleeping bag is placed on a bright blue inflatable mat. The tent's dark grey or black outer shell is visible at the top and sides. The entire setup is on a green lawn. The text "SLEEPING BAG" is centered over the sleeping bag in white, all-caps font.

SLEEPING BAG

NORTEK Lyng sleeping bag is designed for those who crave freedom and flexibility in the wild. The Lyng combines warmth, mobility, and smart design to keep you comfortable in any outdoor setting. Imagine waking up in your tent, staying cozy in your sleeping bag while you make coffee, organize your gear, or even step outside without ever losing that insulating warmth. With dual side zippers for arm freedom and a bottom zipper that lets you move your legs, the Lyng transforms into a wearable layer, perfect for tasks around camp or enjoying the sunrise without leaving your cocoon of comfort.

Crafted with DownTech-treated hydrophobic down, the Lyng provides premium warmth at a featherlight weight. Its 850 Down fill power ensures maximum insulation even in damp conditions, so you stay warm regardless of the weather. The outer fabric is water-repellent, adding another layer of protection, while the waterproof compression bag keeps the Lyng dry during transport, no matter how wet the environment.

For adventurers who value mobility without compromising on warmth, the Lyng Sleeping Bag is the ideal companion. Embrace the freedom to stay warm, stay mobile, and fully experience life in the wilderness with Lyng.

☐☐ **NORTEK LYNG SLEEPING BAG OFFERS WARMTH, MOBILITY AND WATER RESISTANCE, WITH ZIPPERS FOR ARM AND LEG FREEDOM, MAKING IT PERFECT FOR VERSATILE, COMFORTABLE OUTDOOR ADVENTURES ☐☐**

# LYNG

## Solutions

*850 FP DownTek hydrophobic down retains warmth even when wet. Extremely warm, lightweight, and compressible. Side zippers offer mobility, while multiple internal pockets store small gear and allow sock drying. Water repellent shell for added dryness.*

  - 850 FP
  - DownTek - Hydrophobic
- **Shell:**
  - 10D ripstop nylon
  - Water repellent
- **YKK Zippers:** Main zipper: Anti snag. Side zippers YKK

SLEEPING PAD

NORTENT  
OUTDOOR

From the moment you settle into camp and unroll the NORTENT Torv 7, you sense its promise of deep rest in any season. With an unwavering focus on comfort, it offers a generous 197 cm of length, 68 cm of width, and 11 cm of loft, yet remains impressively lightweight at just 740 grams. Beneath its sturdy surface, five layers of insulation, each featuring an aluminum film, reflect and retain warmth, keeping the cold of alpine nights or winter forests at bay.

The single valve, ingeniously paired with the stuff sack that doubles as a pump, makes inflation and deflation remarkably simple, ensuring you spend more time resting and less time fiddling with gear.

When you finally stretch out, the pad cradles you so well that pressure points vanish, leaving you blissfully unaware of the ground beneath.

Free of fluoride in both coating and fabric, it reflects NORTENT's dedication to nature, so you can sleep soundly knowing your gear respects the wilderness that calls you back night after night.

□ □ **NORTENT TORV 7 MERGES LUXURIOUS SPACE, ALL-SEASON WARMTH, AND PLUSH COMFORT INTO AN EXCEPTIONALLY LIGHT SLEEPING PAD.** □ □

# TORV 7

## Solutions

*One of the simplest but most vital solutions to a good night's rest outdoors is having enough room to move. Many pads on the market fail to deliver the space you need to stretch out and shift positions comfortably, causing restless nights and stiff mornings. That's why the Torv 7 is designed to be roomy from the ground up. Measuring 197 cm in length, 68 cm in width, it ensures you won't find yourself hanging off the edge when you roll over or stretch your legs.*
